CORDIALLY INVITE YOU TO

# AFTER HURRICANE MATTHEW

## RESOURCES, CAPACITIES, AND EQUITABLE RECOVERY OF DEVASTATED COMMUNITIES IN HAITI

Large-scale disasters that exceed the current coping capacity of Haitian socio-ecological systems are increasing. At the same time, post-disaster interventions on the parts of the Haitian government, humanitarian aid organizations, and international donors often fail to recognize the existing assets of the most impacted communities. A three-month assessment conducted by the Interuniversity Institute for Research and Development (INURED) examined both the local resources and pressing needs of rural communities across the Grande-Anse and Sud, two Haitian departments devastated by Hurricane Matthew in October 2016.

This Town Hall will present the findings of the study “Mapping Assets-Access for Equitable Recovery and Reconstruction from Hurricane Matthew in Haiti,” and will feature a discussion with local leadership from the most affected areas.

UNIVERSITY OF MIAMI  
DONNA E. SHALALA STUDENT CENTER  
THIRD FLOOR, EAST BALLROOM  
1330 MILLER DRIVE  
CORAL GABLES, FL 33146

THURSDAY, APRIL 27, 2017  
EVENT: 4:30PM - 6:00PM  
FOLLOWED BY A RECEPTION

Parking available in the Pavia Garage
